

California NOW Stands for Abortion

Released on January 22, 2024

The Supreme Court issued its landmark decision in *Roe v. Wade* — "claiming that the unduly and restrictive state regulation of abortion was unconstitutional" on January 22, 1973. Then, on June 24, 2023, The Supreme Court reversed the decision, endangering the lives of individuals across the United States.

Women are dying to receive basic healthcare just as we knew it would occur. The restrictive and cruel bans were ready to be implemented in many states. State legislators introduced 563 provisions to restrict access to abortion since 2022. We know these bans impact the lives of marginalized groups disproportionately.

Let's be clear. We stand for bodily autonomy and an individual's right to make decisions about abortion. We will continue to resist and fight against any legislation that seeks to limit or restrict women's freedoms.

Won't you join us?
